## ABOUT US

### WHAT WE DO

The training center was established in 1991. Specializing in aluminothermic rail welding, the Pandrol Training Academy training center has over 30 years of experience.

Our center offers world-class expertise providing training in aluminothermic welding and arc welding repair of rails and manganese crossing.

### OUR TRAINERS

Training engineering is designed by a team of professionals with cross-disciplinary skills in both applied pedagogy and aluminothermic welding technique associated with all rail profiles.

The training is provided by experienced trainers, all certified by the SNCF and recognized for their skills at the international level.

All our trainers are accredited by Pandrol SAS with international diplomas according to the EN14730-2 standard.

Technical assistance and advice are provided by our team of trainers technicians technical managers engineers and doctors in metallurgy.

**Our expertise is unmatched.  
You can count on us !**

The training center is QUALIOPI certified

it also meets Quality Environment & Safety standards
